DADE. 1675.

A
PROGNOSTICATION

In which you may behold the state of
this year of our Lord God, 1675.

Being the Third from the Bissextile, or Leap-year.

Having the Disposition of the FOUR
Seasons, the Eclipses, the Oriental and Oc-
cidental Position of the Planets, with the
increase and decrease of the Moon, and
daily inclination of the weather.

Also certain Physical verses, and short
Rules for Husbandry for every moneth
throughout the year.

With other Notes of good Consequence.

By WILLIAM DADE, Gent.

LONDON,

Printed by T. N. for the Company of
Stationers, 1675.

**A Brief and necessary Table, for the beginning
and ending of the four Terms,
with their Returns.**

Hillary Term begins *January 23.* and ends *February 12.* and hath four Returns.

Octab. Hillarii. <i>Jan. 21.</i>	Craft. Purif. <i>Feb. 3.</i>
Quind. Hillarii. <i>Jan. 28.</i>	Octab. Purif. <i>Feb. 10.</i>

Easter Term begins 17 days after Easter, and ends the Monday after Ascension-day, and hath five Returns.

Quind. Pasch. <i>Apr. 19.</i>	Quinq. Pasch. <i>May 10.</i>
Tres Pasch. <i>Apr. 26.</i>	Craft. Ascen. <i>May 14.</i>
Mense Pasch. <i>May 3.</i>	

Trinity Term begins the Friday after Trinity Sunday, and ends the Wednesday fortnight after, and hath four Returns.

Craft. Trin. <i>May 31.</i>	Quind. Trin. <i>June 14.</i>
Octab. Trin. <i>June 7.</i>	Tres Trin. <i>June 21.</i>

Michaelmas Term begins the 23. of *October*, and ends the 29. of *November*, and hath six Returns.

Tres Mich. <i>Octob. 20.</i>	Craft. Mart. <i>November 12.</i>
Mense Mich. <i>Octob. 27.</i>	Octab. Mart. <i>November 19.</i>
Craft. Anim. <i>Novemb. 3.</i>	Quind. Mart. <i>November 26.</i>

Note that the Exchequer openeth eight days before any Term begins, except Trinity Term, in which it openeth onely four days before.

On these days following the Judges sit not at Westminster.

---	----------	--	-----

A Prognostication.

A Description of the Four Quarters or Quarters of the Year.

And first of Winter.

Sol in ♍, ♎, ♏.

Winter Quarter (after the Astronomers Account) began the Eleventh of *December*, 1674. at 10 of the Clock in the morning, and continues till the 10th. of *March* this year 1675. So that always the first part of the Astronomical Winter, is in one Politick year, & the latter end thereof is in the other. At which time was the shortest day of the year by reason of the Suns greatest declination from the Equinoctial Line.

This Season of its own disposition, is known to be cold and moist, contrary to the quality of the Summer; and in this quarter, the inward parts of Man are very hot, and being healthful, may receive plenty of food; because natural heat is now comforted, and is gone inward, and there increased, and maketh digestion the better.

How the Weather will be therein disposed, is noted for each day through out the Quarter.

The Sickneses whereunto this Quarter is most inclined are Rhumes, Gouts, Pusses, Sore-eyes, Melancholy, Coughs, Catharrs Sciaticae, Falling-Sickness, diseases proceeding of Rottenness and corrupt Humours, with divers kind of Infirmities incident among Women.

DADE, 1675.

Of the second Quarter of the Year, called
The Spring.

Sol in γ , δ , II.

THE Spring time (being the most pleasant and wholesome Season of the Four) taketh its beginning on Wednesday the 10th of *March*, at 49 m. past 9 in the morning, when the Sun entereth into the first minute of the Equinoctial point *Aries*, making the dayes and nights of equal length; which quarter endeth the 11th. of *June*, when the Sun entereth into *Cancer*.

This season is naturally hot and moist, and is of the Sanguine complexion, being the most temperate and healthful time of the year, and is therefore accounted the fittest time to ease diseased Bodies in, and to restore health again in those in whom formerly it hath been decayed by any kind of evacuation.

The particular condition thereof may be seen in the daily disposition of the Season.

The infirmities of this Quarter are Melancholie, Madnes, the Falling-Sickness, bleeding at the Nose, Hoarseness, Coughs, Itch, Scales, many Vlcers and small Apostumes, the Gout and pain in the Joynts, Plurisies, Dropsies, pestilent Agues,
Shortness

A Prognostication.

Shortness of Breath, Faintings, Pain in the Head, Eyes, and Stomack, rotten Feavers, and other strange Diseases.

Of the third Quarter of the Year, called Summer.

Sol in ♋, ♌, ♎.

Summer (accounted the third part of the Year Astronomical) taketh always its beginning at the time of the Suns entrance into the first min. of the Solstitial Sign *Cancer*, which is this year on Friday the 11. of *June*, 24 min. after high noon at which time he makes his greatest declination from the Equinoctial towards the North, and causeth the longest day and shortest night in the year; and so Summer holdeth on till the 13. of *September* following.

In this Quarter the Stomach cannot digest such hard Meats as it will in the Winter season, for that natural heat is now distributed into the exterior parts, and man is not now so hot within as in winter.

As for the disposition of the Weather, you may see in the daily inclination.

The Sickneses at this time are divers, as burning Agues, Plurisies, Frensies, hot Apostumes, divers pains in the head, sundry Inflammations, and new Infirmities, proceeding especially of hot cholerick humours, wherewith many will be sore molested.

Of the fourth Quarter of the Year called
Autumn or Harvest.

Sol in \cap , m, 7.

Autumn or Harvest (being the Fourth or last Quarter of the Year) beginneth upon Monday the 12 of *September*, a quarter after four in the morning, the Sun then making his entrance into the first minute of the second Equinoctial Sign *Libra*, working the same effect that he did at his entring into *Aries*, that is, making the days and nights of equal length, he rising at six in morning, and setting at six at night; and this Quarter doth last until the eleventh of *December* following.

The quality of this Season is naturally cold and dry, yet by reason of its mutability, it is the most unwholesome; by means whereof, it is more subject to sickness then any other: for the dregs of all diseases of the former parts of the year, will now break forth and be seen.

How the air is like to be inclined all Harvest, may be seen in the daily disposition of the Season.

The Diseases of this Quarter are like to be many and dangerous, as Black Jaundies, Megrims, the Falling-Sickness, Opilations in the Spleen, difficulty of Breathing, Convulsions, Dropsies, Sciticaes, Biles, Toothach, and many more. *From which, good Lord deliver us.*

Of

A Prognostication.

OF ECLIPSES, and principally of such as will be visible to us this Year.

Five times this Year will the Luminaries be Eclipsed, viz. The Sun twice, and the Moon three times; of which, some of them will be visible to us in *England*, and of those I shall say something, omitting to say any thing of those that cannot be seen here, onely tell you the time when they will happen.

The first Eclipse will be of the Moon, and will be upon *New-years-day* to be seen about 8 of the clock at night; it will be a total Eclipse, and so worth the observing. For, the Eclipse will begin at 34 m. after 5 of the clock in the evening; the middle thereof, when it will be totally darkened, will be at half an hour after seven of the clock; and the end (when she will be fully restored to her light again) will not be till 24 min. after 9 of the clock. So that from the beginning of this Eclipse to the end thereof, will be contained 3 compleat hours and 50 minutes, which wants onely 10 min. of 4 whole hours.

The second Eclipse is of the Sun, upon the 13 of *June*, about 6 in the morning; but will to us in *England* be scarce perceptible.

The third Eclipse will be of the Moon, upon the 27. of *June*, about three of the clock in the morning; it will be a great Eclipse, and

D A D E, 1675.

the beginning and greatest darkness thereof may be seen by us, but the end cannot, for that the Sun riseth some considerable time before the Eclipse endeth. For, the beginning thereof will be at 37 min. after 1 in the morning: the middle (or greatest darkness) at half an hour after 3 a clock, and the end will not be till 24 min. after 5 in the morning. So that the whole duration of the Eclipse will be 3 hours and 3 quarters, and somewhat more.

The fourth Eclipse will be of the Sun, upon the 6. of *December*, about 4 in the afternoon; but being it cannot be seen here in *England*, I shall say no more concerning it.

The fifth will be of the Moon, and will happen upon the 22. day of *December*, about 3 in the morning: It will (if any) be a very small Eclipse, and so I shall say as little of it,

Here

A Prognostication.

Here followeth certain *Physical Verses*, with a Description how the Planets are placed in the Heavens, either before or after the Sun, whereby you may perceive how they keep their motions, day and night. To which is annexed the New, Full, and Quarters of the Moon, with the daily disposition of the Weather; also short Rules for Husbandry for every Moneth throughout the Year.

Of January.

If thou be sick and help wouldst have,
The counsel of the Learned crave.

If thou hast Health, to keep thee so,
Fly Idleness as a deadly fo.

Saturn is Occidental, and may be seen after Sun-setting, he being in a Quartile Aspect to him.

Jupiter is Oriental, to be seen the morning before the Sun rises.

Mars is Occidental, to be seen when Sun is set.

Venus about the 6. day will be at her greatest distance from the Sun, and begins to be Retrograde; and at the 27 day the Sun and Venus will be in Conjunction.

Mercury, at the beginning of the Moneth, will be at his greatest distance from the Sun; and such as desire to have a view of him, may have their desire betimes in the mornings.

Full Moon the 1. day, 22 min past 7 at night.

The 1, 2, and 3 days, Wet Moist, and Slabby.
The

D A D E. 1675.

The 4, 5, 6, and 7, Cold, but Dry.

Last Quarter the 8 day, 23 min. past 6 at night.

The 8, 9, and 10, Wet and Windy.

The 11, 12 and 13, Dry and Frosty.

The 14 and 15, Clowdy, inclining to Snow.

New Moon the 15 day, 36 min. past 9 at night.

The 16, 17, and 18, Wind.

The 19, 20, 21 and 22, Dry and Cold.

First Quarter the 23 day, 26 min. after midnight.

The 23 and 24. Frost.

The 25, 26 and 27, Wind.

The 28, 29 and 30, Snow or Rain.

Full Moon the last day, at 9 in the morning.

Januaries Instructions for Husbandry.

This Moneth let all kinde of Fruit-trees, and Quicksets: In the New of the Moon (the wind and weather observed) you may set Pease and Beans, Parsnips, and Oats, if the weather prove milde, and the Moon decreasing.

Of February.

Be choice of Food in any wise,

To keep thee warme also precise:

Beware likewise thou let not blood,

Except the Learned think it good.

S *Atura* is in a Sextile Aspect to the Sun and Mercury, and is Occidental.

Jupiter is Oriental, and at the end of the Moneth will be in a Quartile Aspect to the Sun.

Mars is Occidental, and about the middle of the Moneth,

A Prognostication.

Moneth, will be in Square of the Sun.

Venus is under the Sun-beams.

Mercury becomes Occidental, and is in Conjunction with the Sun about the 20. day,

The 1, 2 and 3 days, very Cold.

The 4 and 5, more moderate.

Last Quarter the 6 day, 57 min. past 10 at night.

The 6, 7 and 8, some Rain

The 9, 10 and 11, Mild and Temperate.

The 12, 13 and 14, Fair and dry.

New Moon the 14 day, 4 min past 3. afternoon:

The 15, 16 and 17, Wind and some Snow.

The 18, 19, 20, and 21 Warm and Rainy.

First Quarter the 22. day, 38 min. past 6. at night,

The 22, 23 and 24. very seasonable.

The 25, 26, 27, and 28, Good Spring weather.

Februaries Instructions

This Moneth set Roses, with all other kind of plants, and Quicksets, sow Pease and Onions; as in the Moneth before (the weather considered) you may now garden for Sallet-herbs, Pot-herbs and such like.

Of March.

Now Bleed and Bathe if thou desire,

And Purge also if need require.

Ill humours do in many breed,

Provide in time before you need.

S *Atturn* is under the Sun-beams, and cannot be seen.

Jupiter

D A D E 1675:

Jupiter is Oriental, and in a Trine Aspect to the Sun, and may be seen before Sun-rising.

Mars is in Opposition to *Jupiter*.

Venus is Oriental, to be seen before Sun-rising.

Mercury and *Saturn* is in Conjunction about the 20 day.

Full Moon the 1 day, 17 min. past 5. at night.

The 1, 2 and 3, Cold, but Pleasant.

The 4, 5, 6 and 7, Gentle winde.

Last Quarter the 8 day, 53 min. past 8 in the morning.

The 8, 9, and 10, good Springing weather.

The 11, 12 and 13, some Showers.

The 14 and 15, Warm.

New Moon the 16 day, 50 min. past 8. in the morning

The 16, 17, and 18, Rain or Hail.

The 19 and 20, Cold Wind.

The 21, 22 and 23, Flying Mists.

First Quarter the 24 day, 27 min. past 9 in the morning.

The 24, 25, 26 and 27, Hale, Storms.

The 28, 29 and 30, Fair mild weather.

Full Moon the 31 day, 34 min. past 1 in the morning.

Marches Instructions.

This Moneth (in the New of the Moon) graft, set Quicksets and Vines, cut your Hedges and Vines already growing: Also you may sow Onions, Beans, and Oats, and all manner of Garden-seed.

of

A. Prognostication.

Of April.

Now wholesome Baths thou mayst frequent.

Let blood also, and not repent :

These are good means thee to defend,

From Grievs, the which on thee attend.

Saturn is all this Moneth under the Sun beams,
and cannot be seen.

Jupiter is Oriental.

Mars is in a Sextile Aspect to the Sun, and is Occidental.

Venus is Oriental, and at her greatest distance from the Sun.

Mercury and the Sun are in Conjunction.

The 1, 2 and 3 days Fair and Warm, but

The 4 and 5, Windy.

Last Quarter the 6 day, 34 min. past 10 at night.

The 6, 7 and 8, Mixt weather.

The 9, 10 and 11, sometimes fair ; and

The 12, 13 and 14, sometimes Wind and Rain.

New Moon the 15 day, 28 min. past 1 in the morning.

The 15, 16 and 17, great Winds.

The 18 and 19, Hail Storms.

The 20 and 21, More gentle Showers.

First Quarter the 22 day, a quarter past 8 at night.

The 22, 23 and 24, Cold Winds ; and

The 25 and 26, dark Air.

The 27 and 28, more Serene.

Full

DADE. 1675.

Full Moon the 29 day, 41 min. past 11. before noon.

The 29 and 30 suddain cold Rain.

April's Instructions.

In this month Pole your Hops, sowe Barley and Artichoacks, Bark Trees for *Tanners*, sowe Hemp and Flax, set Citrons, Melons, and Cucumbers, and furnish and replenish your Gardens with Summer-herbs.

Of May.

*Rise early now this Moneth of May,
And walk the Fields that be so gay:
From Surfetting see thou refrain,
Or soon it will procure thy pain.*

Saturn will be in Conjunction with Verus towards the end of the Moneth, he being yet under the Sun-beams.

Jupiter is in Opposition to the Sun.

Mars is Combust with the Sun.

Venus is still Oriental, and may be seen before Sun-rising.

Mercury under the Sun-beams.

The 1, 2 and 3 days, Cloudy mornings, causing The 4 and 5, some Showers and Wind.

Last Quarter the 6 day 16 min. past 1 afternoon.

The 6, 7 and 8, Rain and mixt weather.

The 9, 10 and 11, cold Winds.

The 12 and 13, temperate Air.

New Moon the 14 day, 24 min. past 4 afternoon.

The

A Prognostication.

The 14, 15 and 16, some Hail storms.

The 17, 18 and 19, Rain and Thunder.

The 20 and 21, Dark and Cloudy.

First Quarter the 22 day, 21 min. past 2 in the morning.

The 22, 23 and 24, Mild and Temperate.

The 25, 26 and 27, some Rain.

Full Moon the 28 day, 18 min. past 6 at night.

The 28, 29, 30 and 31, the Moneth ends with Thunder, Lightning, and Showers.

May's Instructions.

In the beginning of this Moneth you may sow the Seeds of Summer-Herbs, which could not endure the cold of the forepassed Moneths. You may yet sow Hemp and Flax; Weed your Hop-Gardens, and take away superfluous Branches, and Moss your Gardens.

Of June.

*Drinks new or sweet taste not at all,
For thereby grows no danger small:
And to thyself such past-time take,
As may in God thee merry make.*

Saturn is yet within the Verge of the Sun-beams.

Jupiter is Occidental, and in Opposition to Mercury.

Mars is in a Trine Aspect to Jupiter.

Venus is yet Oriental.

Mercury is in Conjunction with the Sun.

The

D A D E, 1675.

The 1 and 2 days, Thunder and Wind.

The 3 and 4, Wind and Rain.

Last Quarter the 5 day, 21 min. past 5 in the morning.

The 5, 6 and 7, Cloudy and dark.

The 8 and 9, more clear.

The 10, 11 and 12, Fair, but Windy.

Timber in the Old of the Moon; to uncover the
Roots of your Fruit-trees, Fallow Land for Bar-
ley, cover Herbs from cold, look well to your
Cattle, take Fowls with Nets, or Lime-twigs.

A Description of the Magnitudes, Motions and Distances of the Seven Planets

A Rgol, a laborious and Learned *Astronomer*, giveth this account of the Planets Motions and Distances, to wit,

The Sun is greater then	Saturn,	Nine times.
	Jupiter,	Fourteen times.
	Mars,	Two thousand five hundred thirty five times.
	Venus,	Twelve hundred and seventy times.
	Mercury,	Three thousand seven hundred and five times.
	The Moon,	Ten thousand times.
Saturn is greater then	The Earth,	One hundred ninety six times.
	Jupiter,	The one half.
	Mars,	Two times.
	Venus,	Two hundred eighty six times.
	Mercury,	Four hundred and eighteen times.
	The Moon,	One thousand one hundred twenty two times.
Jupiter is greater then	The Earth,	Twelve times.
	Mars,	One hundred eighty two times.
	Venus,	Eighty four times.
	Mercury,	Two hundred sixty six times.
	The Moon,	Seven hundred and fourteen times.
	The Earth,	Fourteen times.

Venus

Venus is twice as big as *Mars*, and Three times as big as *Mercury*.

Mars contains *Mercury* once and a halfe.

The *Moon* } *Mars* Thirteen times.
 is greater then } *Venus*, Six times.
 } *Mercury*, Nineteen times.

The <i>Earth</i>	} is distant from the Firmament	49150720
<i>Saturn</i>		127864480
<i>Jupiter</i>		35425120
<i>Mars</i>		47490540
The <i>Sun</i>		44720000
The <i>Moon</i>		48958080

Saturn is distant from { *Jupiter* --- 23138640 Miles.
 { *Mars* --- 29361440 Miles.
 { The *Sun* - 3193352 Miles.
 { The *Moon* 36171600 Miles.

Jupiter is distant from { *Mars* --- 7722800 } Miles.
 { The *Sun* - 9294880 }
 { The *Moon* 13532960 }

Mars is distant from { The *Sun* --- 1572080 } Miles.
 { The *Moon* 6310160 }

The *Sun* is distant from the *Moon* 4238080,
 that is, Four Millions, Two hundred thirty eight
 thousand, and eighty Miles.

Hac incredibilia videntur tantum iis, qui Mathematicis demonstrationibus non assueverunt, &c.
